Business

Manorama makes cocoa butter equivalents (CBE) and other specialty fats and butters from tree-borne seeds (sal, mango, kokum and mowrah collected in India; shea from Africa) at one integrated plant at Birkoni, Mahasamund. It sold ₹1,357.7 cr of product in FY26 (standalone, +76.1%), 57% to customers outside India, with an EBITDA margin of 27.1% and PAT of ₹233.2 cr. Named customers include Ferrero, Mondelez, Mars, Hershey and Nestlé; two customers were 21.05% and 19.49% of FY26 revenue (audited). Fractionation capacity is 47,500 tpa, heading to about 52,000 tpa; a ₹460 cr expansion (new fractionation, refinery, cocoa-butter alternative, Burkina Faso processing) targets FY28.

Investment view

- **Customer concentration.** Two customers are 40.5% of revenue (audited note).
- **Business quality is high.** Revenue ×3.9 and PAT ×7.8 in three years (FY23–FY26); margins stepped from 16% to 27%; FY26 cash from operations ₹259 cr after two negative years; auditor's opinion unmodified.
- **The price pays for more than we can underwrite.** 34x our FY28E EPS of ₹53.4. Our DCF (cost of equity 12.5%, beta 1.0) gives ₹795 today / ₹895 in 12M; 28x FY28E EPS gives ₹1,495; blend ₹1,195, target ₹1,195.
- **The rating is beta-sensitive.** Beta evidence is mixed: 0.26 (Simply Wall St) vs 0.53 / 1.31 / 1.18 (Trendlyne, 3M / 1Y / 3Y). At 0.26 our model gives a Buy (target ₹2,260); the rating is Sell at any beta above about 0.5. The market-implied cost of equity is about 8.5%.
- **Governance to watch.** Related parties supplied 39% of FY26 purchases (₹192 cr from a director-influenced entity, ₹153 cr from a subsidiary); ₹7.0 cr performance bonus to the chairman; overseas subsidiaries still being funded (consolidated PAT is ₹8.3 cr below standalone).
- **Street view differs.** Trendlyne: 3 analysts, Strong Buy, target ₹2,111 (about 38x their FY28E EPS of ₹55.5). Their FY27E/FY28E EPS (₹48.0 / ₹55.5) are close to ours (₹48.3 / ₹53.4): the gap is the multiple, whose basis is not in our sources.

Catalysts

- Q2 FY27 results: utilisation, margin hold at 25–27%, subsidiary losses (Q1: about ₹3 cr).
- Debottlenecking to ~52,000 tpa (Q3 FY27); ₹460 cr expansion commissioning from Q3 FY28; Brazil (Dekel) ramp.

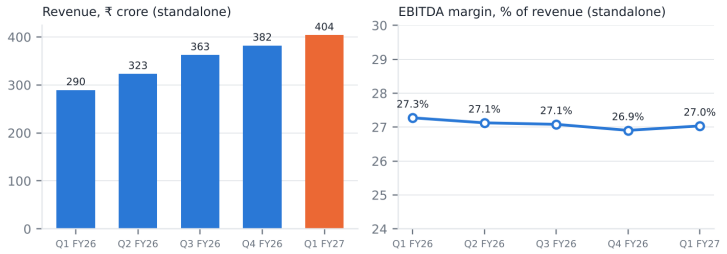

Key risks

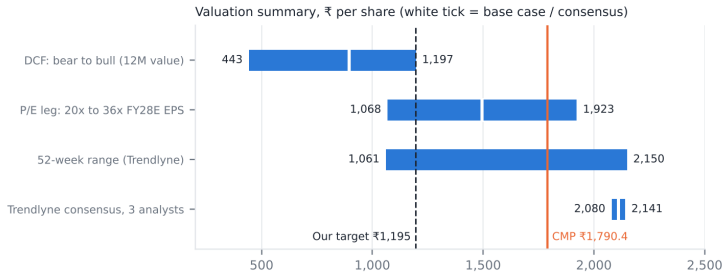

- Single-segment, single-plant concentration; seed supply (forest collection, weather, export rules, e.g. Nigeria shea export ban).
- Related-party sourcing; forex (50–60% hedged); regulation of CBE use in chocolate; EU/India allow up to 5%.
